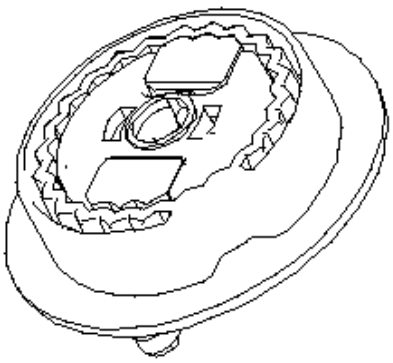
NEW FRICTIONED CAM FOR NOZZLE ARM MOTOR	**INFORMATION**

The nozzle arm motor on the above-named machines has been equipped with a new frictioned cam (part code **251519**), replacing the previous one (part code **0V3692**).
The cam is fitted with a clutch, in order to prevent the motor being damaged by mechanical forces.

The new clutch releases the nozzle motor when the values of traction/compression are too high.
These high values could compromise the motor's reliability.



This improvement takes effect from the following serial numbers.

Vending Machine	Date	Serial number
Astro	28/06/2004	42700013
Kikko	02/07/2004	42700979
